

Axis Tables

Axis connects people both digitally or physically through its extensive versatile design focused on power and connectivity.

Whether its for conferencing, training, meeting or collaboration - whether in person or digitally - Axis offers a variety of top sizes and configurations.

Design by Allermuir Design Team

Its core design ensures seamless integration of power and data, making it easier for users to stay connected.

Design

Allermuir Design Team

Our team of talented in house designers are responsible for creating elegant, innovative furniture designs which not only look beautiful, but minimize the impact on the world around us.

They come from all over the world, but are based in our Design Centre located in a quiet Lancashire village just outside the Ribble Valley. Our dedicated facility is over three floors which include studios, a materials test center and prototyping lab.

Summary of Grain Depth and Structure for TFL Premium Wood Grains

TFL Premium Wood Grains are part of Egger's Feelwood range, characterised by a deeper and more pronounced grain structure compared to standard TFLs. To manage this depth and prevent damage to the decorative paper, Feelwood decors incorporate additional barrier layers. This construction enhances impact resistance, bending strength, and durability.

What makes the Feelwood TFL Premium Woodgrains?

The deeper texture in Feelwood decors is synchronized with the visual pattern, creating a highly realistic wood effect. This design also results in a slight thickness increase of approximately 0.6mm.

These features distinguish Feelwood products from standard TFLs, offering superior durability and enhanced aesthetic appeal as a unique selling point.

Due to the more pronounced grain structure, TFL Premium Wood Grains may not be ideal where a smoother finish is required.

Samples can be ordered through our GroupPortal or by contacting customer service.

Global Laminates

Brite White Chestnut Woodline Dark Chocolate Diamond Black Ebony Fog
